

2M-70CM 300 Ohm Ladder Line (Twin Lead) J-Pole

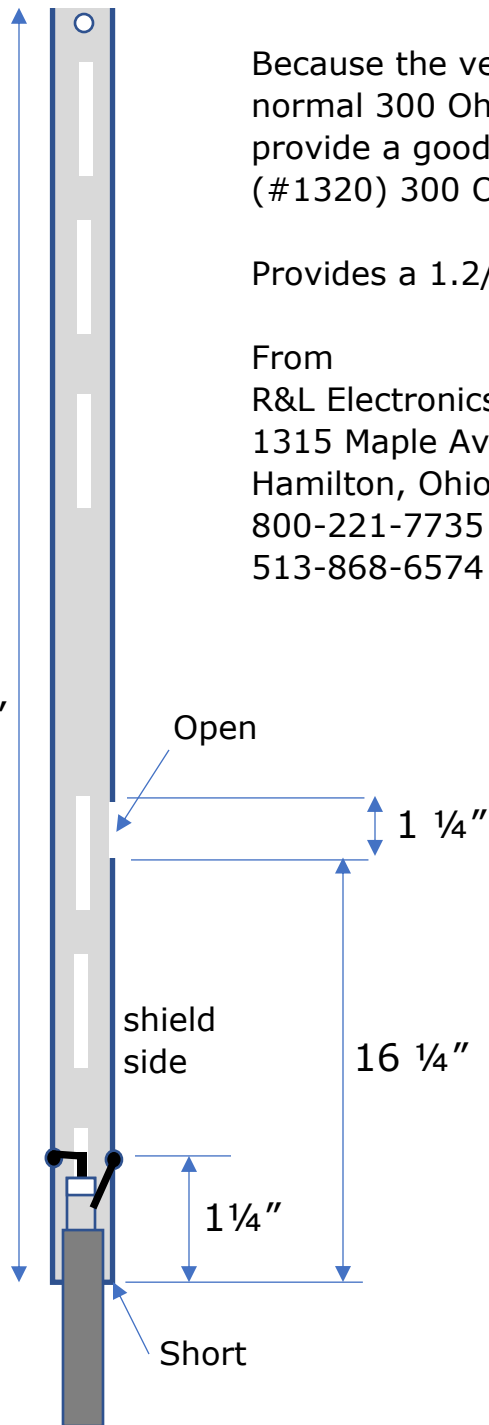

Open

Because the velocity factor for this ladder line is different from normal 300 Ohm twin lead, the traditional dimensions will not provide a good match. Here is a best-fit for 2M-70CM using (#1320) 300 Ohm ladder line (twin lead), 20GA, black.

Provides a 1.2/1 VSWR match for center band on 2M and 70CM.
